

Digital.ai Continuous Testing

for Government Agencies

Web and mobile testing platform

Digital.ai Continuous Testing, formerly Experitest, is a continuous testing platform that can be deployed as a SaaS or an on-premises solution. Digital.ai Continuous Testing helps government agencies test user experiences across all devices and web browsers by providing test coverage across 2,000+ real devices. Digital.ai Continuous Testing also seamlessly integrates with DevOps/DevSecOps tools, so developers can ultimately deliver high quality and secure applications.

Core competencies

Application release

- Accelerate testing and release cycles
- Improve end-user experience
- Automate manual testing procedures and requirements

Real-time feedback

- Continuous performance, accessibility, and functional testing
- Find code problems quicker during DevOps processes
- Increase developer efficiency and productivity

User-friendly platform

- Consolidate web and mobile application testing into one platform
- Built with both technical non-technical staff in mind
- Works with all languages, test frameworks, and integrated development environments (IDE)

Testing infrastructure

- 2,000+ real mobile devices and web browsers
- All mobile devices and OS versions
- ISO 27001 and SOC 2 certified datacenters

Past performance

- Bank of America
- JP Morgan Chase & Co.
- FedEx
- EY
