

Digital.ai Continuum

for Government Agencies

End-to-end process tracking

As organizations move forward with their digital transformation initiatives, agile planning and DevOps are often disconnected. Digital.ai Continuum with Digital.ai Agility, formerly VersionOne, and Digital.ai Release, formerly Xebialabs XL Release, collectively show the status of individual work items at different stages of the software development lifecycle (SDLC) in a single view, enabling agencies to easily track their efforts from planning to production.

Core competencies

Reduce risk

- Identify release rogue commits
- View high-risk release components
- Reduce frequent release failures and rollbacks

Eliminate silos

- Unify tools, data, activities, and processes
- Better decision making throughout entire SDLC process
- Enable development teams with all work item details

Analytics

- Accurate and up-to-date reporting on SDLC activities
- Improve bottlenecks and SDLC processes
- Identify release components with critical process issues

Past performance

- Defense Information Systems Agency (DISA)
- Open Source Information System (OSIS) - Intelligence
