

# Digital.ai Agility

## Enterprise agile planning edition

### feature matrix

Achieve the perfect blend of speed, efficiency, and innovation at scale with an enterprise agile planning solution that connects technology investments to strategic value by providing unparalleled visibility, unified data, OKR-driven portfolio management, and embedded analytics and dashboards to CIOs, PMOs, and Product Management leaders.

Prioritize high-value software planning and execute software delivery flawlessly across agile DevOps teams and software delivery pipelines with native integrations and an easy-to-use open API framework, a well-structured pipeline, balanced capacity, and increased velocity, driving superior quality outcomes and ROI.

Foster a culture of innovation and customer-centricity, stay on top of at-risk features, and always hit your release dates through efficient agile DevOps management, informed decision-making, and a single, reliable source of truth. Digital.ai helps you embrace change, drive continuous improvement, and lead your enterprise to success.

<b>Edition feature matrix</b>	<b>Essentials edition</b>	<b>Pro edition</b>	<b>Premium edition</b>
<b>Portfolio management &amp; OKRs</b>			
Embedded OKRs (1)		X	X
Team-level agile planning and team forecasting	X	X	X
Status roll up across portfolio planning and execution	X	X	X
<b>Planning</b>			
Idea management	X	X	X
Strategic roadmap planning	X	X	X
Program increment and sprint planning, tracking, and status	X	X	X
Epic and story management	X	X	X
Prioritization based on value and business goals	X	X	X
Cross-portfolio upstream/downstream dependency management	X	X	X
Support for SAFe®, other leading agile methodologies, and custom frameworks	X	X	X

<b>Edition feature matrix</b>	<b>Essentials edition</b>	<b>Pro edition</b>	<b>Premium edition</b>
<b>Connectivity - integration &amp; synchronization</b>			
Bi-directional data synchronization		X	X
Native plugins for Atlassian Jira Software and Jira Service Desk		X	X
Native plugins for Microsoft Azure DevOps, ServiceNow, Micro Focus ALM/QC		X	X
Open integrations framework to create your own plugins		X	X
<b>CI/CD traceability</b>			
End-to-end linking and tracking of agile stories, defects, and code commits		X	X
Early warnings for unpromoted code changes		X	X
Progression board		X	X
Immediate access to detailed history and commits of a work item		X	X
Track value beyond development done at the story or defect level		X	X
Allows monitoring changes, recognizing patterns, and reverting		X	X
Understand what versions are where in the delivery process		X	X
<b>Operational reports</b>			
Executive dashboards and scorecards	X	X	X
Planning level	X	X	X
Team level	X	X	X
Iterations/sprints	X	X	X
Testing/quality	X	X	X
Built-in metrics, analytics, and dashboards, plus forecasting	X	X	X

Edition feature matrix	Essentials edition	Pro edition	Premium edition
<b>Agility Planning Lens and analytics</b>			
Scrum Master & DevOps Manager dashboards to streamline task timelines, assess impacts, and ensure software delivery cohesion			X
25 out-of-the-box, process-aware dashboards			X
Support for hierarchical rollups of portfolio, product, and sprints			X
Self-service data exploration			X
100+ pre-built metrics. Examples include: program increment, application release train metrics, flow analysis, velocity, throughput, portfolio, investment progress, resource utilization, and more.			X
Streamlined change management and flow acceleration via AI/ML-driven change risk prediction and flow acceleration (2)			X
Pre-built connectivity to both Digital.ai and third-party solutions			X
<b>Deployment options and support (bundled with essentials, pro, and premium editions)</b>			
Self-hosted, Hosted, Hybrid, FedRAMP Gov Cloud (3)			
Hosted installation provides the option to use the following capabilities: Single sign-on (SSO), allow listing, sandbox environment (one included), encryption at rest, and disaster recovery.

## AI-machine learning predictive intelligence

Intelligence is an AI-powered predictive analytics tool that combines data from Digital.ai and third-party products into one data foundation. It helps solve software delivery issues by making information easier to find, group, and analyze. Its predictive analytics help identify trends and recommend actions to mitigate the risk in delivering secure, high-quality digital products at speed and at scale.

### Intelligence change risk prediction

Agile Planning Lens

AI-machine learning powered analytics

(1) Requires Digital.ai Identity Services

(2) AI/ML predictive analytics requires Digital.ai Intelligence

(3) Intelligence offerings only available in the cloud

## About Digital.ai

Digital.ai is an industry-leading technology company dedicated to helping Global 5000 enterprises automate software delivery workflows across complex technology environments. The company's AI-powered DevSecOps platform automates software releases, improves mobile application testing and security, and provides insights across the software lifecycle. Digital.ai empowers large enterprises to embrace AI responsibly, reduce software-related risk, and amplify developer productivity to deliver innovations that drive business outcomes.

Additional information about Digital.ai can be found at [digital.ai/](https://digital.ai/) and on [Twitter](#), [LinkedIn](#) and [YouTube](#).
