

Digital.ai Intelligence – Release & Deploy Lens

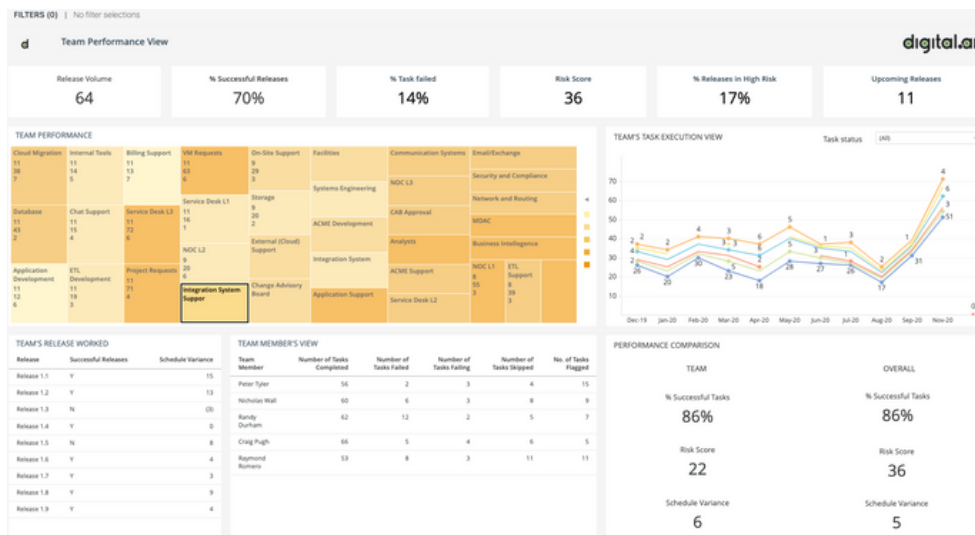

Identify release bottlenecks, optimize cycle time, and prioritize application deployments.

The Release & Deploy Lens is an enterprise-grade, cloud analytics product that provides pre-configured dashboards with hundreds of curated data-driven insights from enterprise agile tools, CI/CD tools, and IT Service management. It helps you prioritize strategic releases, identify application deployment risks, and prevent failure in production, so you increase customer satisfaction and business outcomes.

Digital.ai Release & Deploy Lens includes out-of-the-box integration connectors with various vendor products.¹ It allows you to plug any additional data into the platform anytime and create new metrics and dashboards.

Release & Deploy Analytics Lens

Manage, monitor, and prioritize your application releases, spot critical risks early on, and effectively coordinate execution with a unified view across the DevOps pipeline.

Digital.ai Release & Deploy Lens Key Metrics

Deploy & Release lens correlates data from nearly all best-of-breed DevOps solutions, including CI/CD (Digital.ai Release and Deploy, Azure DevOps), IT Service Management (ServiceNow, Zendesk), and many others. Sample analysis that can be performed with this lens include:

- **Release Analysis** – Understand why release schedule variance is going up, what type of tasks are being executed, and what is causing release bottlenecks.
- **Risk Management** – See risk scores for each release, find specifics of high risks deployments, and compare deployment failure rate to deployment frequency.
- **Optimize Cycle Time** – Identify tasks and dependencies that cause release delays, find teams with an increased workload, and perform metrics trends.

¹ See all available integrations at the Digital.ai Integration System Marketplace <https://integrations.digital.ai/catalogue>

Additional Release & Deploy Lens Capabilities

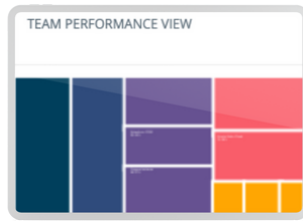

Integration Marketplace	Out-of-the-box plugins to leading application development and DevOps tools.
Domain Specific Dashboards	Dozens of pre-configured, ready-to-use dashboards and curated insight metrics.
Cloud Datalake	Integrated data from multiple sources, normalized and available in a cloud datalake.
Flexible Platform (BYOM)	Build your own metrics and dashboards to support your business needs.

Release & Deploy Dashboards Sample

Release Executive View

It gives you the full view of your application release pipeline.

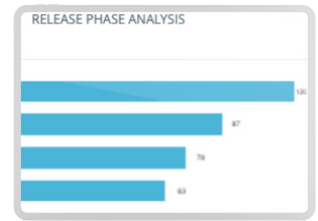

Team Performance View

It helps you effectively coordinate execution and remove risks.

Late Tasks and Impact

It helps you identify bottlenecks and optimize cycle time.

Release Phase Analysis

It helps you track schedule variances and overdue.

Intelligence AI-Powered Analytics Add-On

Intelligence Release & Deploy Lens is your first step towards AI-Machine Learning for application release and deployment predictability. The Intelligence Change Risk Prediction package enables augmented data-driven decisions to prevent critical issues while reducing the cost of release failure in production.

About Digital.ai

Digital.ai is an industry-leading technology company dedicated to helping Global 5000 enterprises achieve digital transformation goals. The company's AI-powered DevOps platform unifies, secures, and generates predictive insights across the software lifecycle. Digital.ai empowers organizations to scale software development teams, continuously deliver software with greater quality and security while uncovering new market opportunities and enhancing business value through smarter software investments.
