digital.ai™

ENTERPRISE DEVOPS IS HARD.
WE MAKE IT SIMPLE.

Designed for complex enterprises with complex pipelines, Digital.ai (formerly XebiaLabs) simplifies DevOps. Connect all your DevOps tools, manage their interactions, and create a data hub for reporting — without wasting time on ad-hoc scripting and endless maintenance.

Digital.ai is the world's only end-to-end DevOps toolchain orchestration and reporting platform

| Release Orchestration	Deployment Automation	DevOps Intelligence	Comprehensive Pipeline Reporting
Orchestrate, automate and get visibility into your release pipelines.	Automate and standardize complex application deployments to any environment.	Measure and optimize DevOps performance to maximize ROI.	Prove the end-to-end compliance of your software delivery pipelines.

Power Your End-to-End Continuous Delivery Process with the Digital.ai Value Stream Platform

The world's first on-demand audit report: Push the button, get the report. You're done.

The Digital.ai Value Stream Platform is the only way to capture Software Chain of Custody evidence and prove the end-to-end compliance of your software delivery pipelines. Get 100% visibility into your complete software delivery lifecycle, so you have evidence of who did what, when, where, and how—for every release.

Enterprise-scale Technology

" ──

If you're looking to improve, accelerate, and streamline your end-to-end software delivery, and enforce compliance requirements in a repeatable, auditable process, you want XebiaLabs. ──

Vito Iannuzzelli, Assistant VP of IT, NJM Insurance Group

- Orchestrate your end-to-end DevOps toolchain with Digital.ai

- Easy-to-read dashboards, detailed analytics, and powerful reports

- DevOps infrastructure for any environment, from containers to hybrid cloud to mainframe

- Agentless architecture, which means simple, secure, scalable rollouts

- Model-based approach that eliminates scripting and brittle workflows

- Advanced Release Orchestration, built to meet enterprise needs

- Software Chain of Custody that provides visibility into the complete DevOps pipeline

- Predictive DevOps analytics based on machine learning

- Your Mode DevOps that facilitates collaboration between business and technical teams

- Extensive DevOps as Code functionality that lets define everything in code

- Easy on-boarding without a lot of administrative overhead

- Designed to manage people, processes, and tools

About Digital.ai

Digital.ai enables enterprises to focus on outcomes instead of outputs, create greater business value faster, and deliver secure digital experiences their customers trust. The Digital.ai Value Stream Platform seamlessly integrates all the disparate tools and processes across the various value streams, uses data and AI/ML to create connective tissue between them, and provides the real-time, contextual insights required to drive and sustain successful digital transformation. With Digital.ai, enterprises have the visibility they've been seeking to deliver value, drive growth, increase profitability, reduce security risk, and improve customer experience. **Learn more at digital.ai**
